COMMENTS for Authors:

=> Reviewer # 2

This manuscript has good potential, but some corrections must be made to fulfil the standard of the journal. Some additional elaborations must be incorporated, English writing must be checked and Discussion especially must be reviewed with prudence. The following are comment which must be addressed:

- Please review the manuscript again for English editing
- Synchronize format for in-text citations

MATERIALS AND METHODS

Sources of chemicals and drug

- 'Captopril as generic drug purchased from local pharmacy.'
- please state the purpose of Captotril in this study

Preparation and extraction of turmeric

- 'In turn, this rhizome was cut into small pieces and dried at a specified temperature using an oven'
- what was the temperature?

Measuring blood pressure

- Is there a reference for this method?
- Briefly explain this method

Measuring the heart rate

- 'Actually a short R-R interval suggested a rise in the heart rate.'
- Please rephrase as the sentence sounds informal

Frontal QRS-T angle measurement

- Please briefly explain this method

Nitric oxide (NO) serum level measurement

- How was the serum collected?
- Please briefly explain this method

RESULTS

- Please explain results according to the order in Figure 1
- Paragraph 2 is a repetition

-Please include explanation on heart rate

-Figure 1– please indicate $p < 0.05$

DISCUSSION

-Discuss how high fat diet increases hypertension

-How does turmeric possess antihypertensive effect? Explain in terms of mechanism of action

-Please review and arrange the paragraphs to ensure that the flow of the discussion is logical, concise and not repetitive.

COMMENTS for Authors:

1. The English need improvement since there are few grammatical and syntax errors in the manuscript (For example, the words “high-fructose” may be as “a high-fructose”; “as

following:” as “as follows:”; “a 50,” as “50,”). There are some typing mistakes as well, and authors are advised to carefully proof-read the text (For example, the words “repolarization,” may be as “re-polarization”; “group. (p<0.050.” as “group (p<0.05).”).

2. Check the abbreviations throughout the manuscript and introduce the abbreviation when the full word appears the first time in the text and then use only the abbreviation (For example, nitric oxide – NO; pulse wave velocity – PWV; high-fat and high-fructose diet HFHF; electrocardiogram – ECG; photoplethysmogram – PPG; etc.,). And it should be in both abstract as well as in the remaining part of the manuscript.

3. The author should first mention in the abstract and in the manuscript, family name of the *Curcuma longa* along with the Latin binomial classification.

4. In the materials and methods, under the heading blood pressure measurement, the author may include the normal range as well as the range consider as hypertension for the present analysis.

5. In the materials and methods, the term *ad libitum* should be italic.

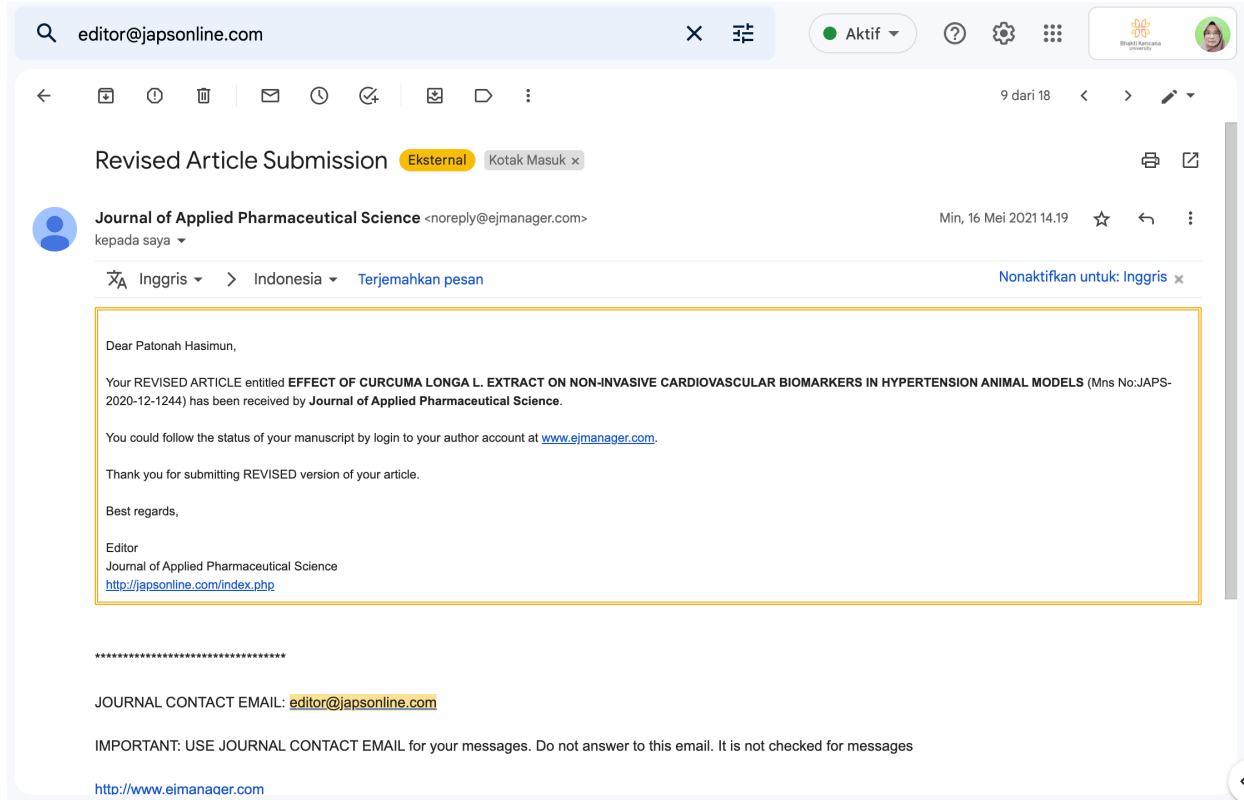

6. In the materials and methods, the software used (SPSS) for the statistical analysis should be included with version.
