Pre conference adalah diskusi tentang aspek klinik sebelum melaksanakan asuhan keperawatan pada pasien dan post conference adalah diskusi tentang aspek klinik sesudah melaksanakan asuhan keperawatan pada pasien. Hasil observasi dan wawancara penulis dengan perawat di ruang dahlia RSUD Majalaya, pelaksanaan pre dan post conference dilakukan belum optimal, karena tidak sesuai aturan kegiatan pre dan post conference. Hal itu berpengaruh pada asuhan keperawatan yang diberikan oleh perawat. Tujuan penelitian ini untuk mengoptimalkan Pelaksanaan pre dan post conference di ruang dahlia RSUD Majalaya Tahun 2023. Penelitian dilakukan dengan metode deskriptif. Jumlah sampel penelitian sebanyak 17 orang perawat dengan teknik pengambilan sampel total sampling, pengumpulan data diperoleh melalui wawancara dan observasi. Setelah dilakukan implementasi keperawatan yaitu penerapan role play tentang pre dan post conference selama 2 minggu menunjukkan hasil observasi setelah dilakukan role play terlihat adanya peningkatan perawat dalam menerapkan pre dan post conference di ruang dahlia RSUD Majalaya. Untuk itu diharapkan kepada pihak rumah sakit dapat mengikuti standar operasional prosedur dalam memberikan asuhan keperawatan.

Kata Kunci : Pre Conference, Post Conference, Keperawatan

ABSTRACT

OPTIMIZING THE PROVISION OF NURSING CARE TO CLIENTS THROUGH ROLE PLAY WITH THE IMPLEMENTATION OF PRE POST CONFERENCE IN THE DAHLIA ROOM, MAJALAYA Ho

Pre conference is a discussion about clinical aspects before carrying out nursing care to patients and post conference is a discussion about clinical aspects after carrying out nursing care to patients. The results of the author's observations and interviews with nurses in the dahlia room at Majalaya Hospital, the implementation of pre and post conferences was not optimal, because they did not comply with the rules for pre and post conference activities. This affects the nursing care provided by nurses. The purpose of this study was to optimize the implementation of pre and post conferences in the dahlia room at Majalaya Hospital in 2023. The research was carried out using a descriptive method. The number of research samples was 17 nurses with a total sampling technique, data collection was obtained through interviews and observation. After the implementation of nursing, namely the application of role play regarding pre and post conference for 2 weeks, it showed that after the role play was carried out, it was seen that there was an increase in nurses implementing pre and post conference in the dahlia room at Majalaya Hospital. For this reason, it is hoped that the hospital can follow standard operating procedures in providing nursing care.
