

ABSTRAK

Hubungan Peran Kader Dengan Pemantauan Pertumbuhan Balita Di Posyandu Di Wilayah Kerja Puskesmas Solokan Jeruk Kabupaten Bandung Tahun 2023

Peran kader dalam keberhasilan posyandu tak lepas dari kerja keras kader yang dengan sukarela mengelola posyandu di wilayahnya masing-masing, kurangnya pelatihan dan pembinaan keterampilan memadai bagi kader menyebabkan kurangnya pemahaman tugas kader, lemahnya informasi serta koordinasi antara petugas dalam kegiatan posyandu dapat mengakibatkan kurangnya tingkat kehadiran balita ke posyandu. Tujuan penelitian ini adalah Mengetahui hubungan peran kader dengan pemantauan pertumbuhan balita di posyandu desa solokan jeruk (wilayah kerja puskesmas solokan jeruk) Kabupaten Bandung tahun 2023. Penelitian ini menggunakan metode penelitian *kuantitatif* . menggunakan pendekatan *cross sectional*. Populasi dalam penelitian ini yaitu seluruh Populasi dalam penelitian ini yaitu seluruh ibu balita ke di Wilayah Kerja Puskesmas Solokan jeruk sebanyak 624 orang orang dan sampel sebanyak sebanyak 87 orang. Teknik pengambilan sampel dalam penelitian ini menggunakan *Cluster Random Sampling*.

Diketahui Sebagian besar kader tidak aktif dalam pemantauan tumbuh kembang. Sebagian besar pemantauan pertumbuhan balita tidak dilakukan. Terdapat hubungan antara peran kader terhadap pemantauan pertumbuhan balita.

Diharapkan Bidan untuk selalu memantau cakupan angka penimbangan dan perlu adanya pengawasan terhadap pemantauan pertumbuhan balita sehingga pengawasan dapat dilakukan.

ABSTRACT

The Relationship between the Role of Cadres and Monitoring the Growth of Toddlers in Posyandu in the Working Area of the Solokan Jeruk District Health Center

Bandung in 2023

The role of cadres in the success of posyandu cannot be separated from the hard work of cadres who volunteer to manage posyandu in their respective areas, the lack of adequate training and skills development for cadres causes a lack of understanding of cadre duties, weak information and coordination between officers in posyandu activities can result in low levels of attendance. toddlers to posyandu. The aim of this research is to determine the relationship between the role of cadres and monitoring the growth of toddlers at the Posyandu in Solokan Jeruk village (working area of Solokan Jeruk Community Health Center) Bandung Regency in 2023. This research uses quantitative research methods. using a cross sectional approach. The population in this study is the entire population in this study, namely all mothers of toddlers in the Working Area of the Solokan Jeruk Community Health Center as many as 624 people and a sample of 87 people. The sampling technique in this research used Cluster Random Sampling.

It is known that most cadres are not active in monitoring growth and development. Most of the growth monitoring of toddlers is not carried out. There is a relationship between the role of cadres in monitoring toddler growth.

Midwives are expected to always monitor the coverage of weighing numbers and there is a need for monitoring the growth of toddlers so that supervision can be carried out.
