ABSTRAK

Sediaan farmasi memegang peranan penting dalam dunia kesehatan sehingga sistem manajemen pengelolaannya harus diperhatikan dengan baik, efektif dan efisien secara berkesinambungan agar tidak terjadi kekosongan. Salah satu kegiatan pengelolaan perbekalan farmasi adalah pengadaan dan penerimaan. Pengadaan obat dan bahan obat harus dilengkapi dengan surat pesanan. Penerimaan obat dan bahan obat harus berdasarkan faktur pembelian. Penelitian ini bertujuan untuk mengetahui gambaran kesesuaian surat pesanan dengan faktur di Rumah Sakit Tipe D di Kabupaten Karawang. Metode dalam penelitian ini adalah metode deskriptif dengan pengambilan data secara retrospektif dengan penelusuran surat pesanan dan faktur. Sampel yang diambil dalam penelitian ini pada bulan Juli-September 2023 sebanyak 358 surat pesanan dan 414 faktur kemudian didata faktur yang sesuai dan tidak sesuai dianalisa untuk mengetahui persentasenya meliputi kesesuaian nama sediaan obat, bentuk sediaan obat, kekuatan sediaan obat, isi kemasan dan jumlah item obat. Hasil penelitian menunjukkan pada bulan Juli persentase kesesuaian surat pesanan dan faktur sebanyak 82,61%, pada bulan Agustus persentase kesesuaian sebanyak 80%, pada bulan September persentase kesesuaian sebanyak 74,26%. Persentase kesesuaian paling tinggi pada bulan Juli dengan persentase 82,61%.

ABSTRACT

Pharmaceutical preparations play an important role in the world of health, so the management system must be considered properly, effectively and efficiently on an ongoing basis to avoid gaps. One of the activities for managing pharmaceutical supplies is procurement and receiving. Procurement of medicine and medicinal materials must be accompanied by an order letter. Receipt of drugs and medicinal materials must be based on the purchase invoice. This study aims to determine the conformity of order letters with invoices at the Type D Hospital in Karawang Regency. The method in this research is a descriptive method with retrospective data collection by tracing order letters and invoices. The samples taken in this research in July-September 2023 were 358 order letters and 414 invoices. Then the appropriate and non-compliant invoices were recorded and analyzed to determine the percentage including suitability of the name of the drug preparation, form of drug preparation, strength of the drug preparation, content of the packaging and number of item drug. The research result showed that in July the percentage of conformity between orders and invoices was 82.16%, in August the percentage of conformity was 80%, in September the percentage of conformity was 74.26%. The highest percentage of conformity was in July with a percentage of 82.16%.
