

ABSTRAK

Latar belakang: Di Jawa Barat jumlah Kasus Baru Covid-19 sebanyak 6.971 orang terhitung 4 - 5 Maret 2021. Sistem imun yang kuat adalah cara untuk melawan virus. Dampak ketika imunitas menurun membuat tubuh lebih rentan terkena penyakit termasuk penyakit covid-19 ini. **Tujuan:** Mengetahui Gambaran Pengetahuan Keluarga Tentang Imunitas Pada Masa Pandemi Covid-19 di Kampung Rancapanjang Rt 01/Rw 07 Desa Sukamulya Kecamatan Rancaekek Kabupaten Bandung. Pengetahuan adalah hasil penginderaan manusia, atau hasil tahu seseorang terhadap objek melalui indera yang dimiliki. Imunitas adalah cara tubuh manusia dalam melawan dan membunuh benda asing seperti bakteri, virus dan organ transplantasi lainnya. **Metode penelitian :** menggunakan metode deskriptif, dengan Variable gambaran pengetahuan, jumlah sampel sebanyak 73 orang. Pengumpulan data dengan Kuesioner menggunakan *Google Form*. **Hasil:** Sebagian besar dari responden yaitu 54 (74%) responden berpengetahuan kurang, sangat sedikit yaitu 18 (25%) responden berpengetahuan cukup, sangat sedikit yaitu 1 (1%) responden berpengetahuan baik. **Simpulan:** Sebagian besar responden berpengetahuan kurang. Saran diharapkan kepada Desa Sukamulya agar bekerjasama dengan Puskesmas untuk memberikan penyuluhan mengenai peningkatan Imunitas pada masa Pandemi Covid-19 kepada Masyarakat di Desa Sukamulya.

Kata kunci : Covid-19, Imunitas

ABSTRACT

Background: In West Java the number of New Cases of Covid-19 is 6,971 people as of March 4 - 5, 2021. A strong immune system is a way to fight the virus. The impact when immunity decreases makes the body more susceptible to diseases including this Covid-19 disease. **Objective:** To determine the description of family knowledge about immunity during the Covid-19 pandemic in Rancapanjang Village Rt 01/Rw 07 Sukamulya Village, Rancaekek District, Bandung Regency. Knowledge is the result of human sensing, or the result of someone knowing about objects through their senses. Immunity is the human body's way of fighting and killing foreign objects such as bacteria, viruses and other transplanted organs. **Research method:** using descriptive method, with variable description of knowledge, the number of samples as many as 73 people. Data collection with Questionnaires distributed via Whatsapp Numbers using Google Forms. **Results:** Most of the respondents, namely 54 (74%) respondents had less knowledge, very few, namely 18 (25%) respondents had sufficient knowledge, very few, namely 1 (1%) respondents had good knowledge. **Conclusion:** Most of the respondents have less knowledge. Suggestions are expected for Sukamulya Village to cooperate with the Puskesmas to provide counseling about increasing Immunity during the Covid-19 Pandemic to the Community in Sukamulya Village.
